

Brainstorming & Idea Prioritization Template

Date: 18 June 2026

Project Name: House Rent

Maximum Marks: 4 Marks

HOUSERENT MERN - BRAINSTORMING & IDEATION

Project: Rental Marketplace Web Application

Objective: Digital platform for property rental with renter search, owner management, and admin oversight

Core Problem: Fragmented rental market lacks unified verified platform for search and booking

Key Ideas Prioritized:

1. Advanced Property Search (filters by location, rent, type, amenities)
2. Role-Based Dashboards (renter, owner, admin dashboards)
3. Booking Workflow System (request, approve, confirm, track)
4. Owner Verification (admin approval before listing)
5. Security & Authentication (JWT tokens, bcrypt hashing)
6. Responsive UI (Bootstrap + Material UI)

Technology Stack Selected: MERN (MongoDB, Express, React, Node.js)

Team Structure: Full-stack developers, Database admin, QA tester
