PROBLEM STATEMENTS - HOUSERENT MERN

PS-1 RENTER PERSPECTIVE:

I am: A renter searching for rental accommodation

I'm trying to: Find and book suitable rental property conveniently

But: Listings are scattered, no unified booking system, owner verification unclear

Because: Rental searches fragmented across multiple platforms

Which makes me: Frustrated, anxious, uncertain about legitimacy

PS-2 OWNER PERSPECTIVE:

I am: Property owner wanting to rent out property

I'm trying to: List property and manage inquiries efficiently

But: Manual coordination, no verification system, difficult tenant vetting

Because: No centralized platform for rental management

Which makes me: Overwhelmed with manual overhead, concerned about security

PS-3 ADMIN PERSPECTIVE:

I am: Platform administrator responsible for quality and trust

I'm trying to: Maintain quality standards and verify legitimate owners

But: No systematic way to verify identities or monitor listings

Because: No structured admin interface exists

Which makes me: Concerned about platform credibility and scalability
