

Problem - Solution Fit Analysis

Date: 18 June 2026

Project Name: House Rent

Maximum Marks: 2 Marks

PROBLEM - SOLUTION FIT

PROBLEM:

Rental market lacks centralized verified marketplace connecting renters with owners.

Renters search across fragmented platforms. Owners manage manual inquiries.

No admin oversight for verification.

CUSTOMER SEGMENTS:

- Renters (Students, Professionals, Migrant Workers)
- Property Owners (Individual, Small Investors)
- Platform Admins (Trust & Compliance)

SOLUTION: HOUSERENT MERN APPLICATION

For Renters:

Advanced search filters (location, price, type, amenities)

Property detail pages with owner info

Booking request with date selection

Real-time status tracking

For Owners:

Easy property listing

Admin approval workflow

Booking request management

Approve/reject bookings

For Admin:

Owner account approval

Platform overview & statistics

Compliance monitoring

VALUE PROPOSITION:

Renters: Save time, build trust, get transparency, reduce risk

Owners: Passive income, efficient management, built-in verification

Admin: Quality assurance, scalable workflows, platform control

FIT CONFIDENCE: HIGH

Solution directly addresses identified customer problems with scalable technology.
